**W**Hereas since the decease of Dr. Lockyer, many have  
been at a loss to know where his true Universal Pill  
is to be had; which is so Famous in all his Majesties Domini-

Scurvey, Dropie, Stone, Consumption, Aches and Lame-

Mr. Warts his Nephew in St. Thomas's Southwark; and Mr.  
Fye Apothecary without Bishops-gate, London; whom he ap-  
pointed his only Trustees for the same after his Death.

## Rules concerning Husbandry.

**W**hen you mean to plant or graft, consider where the wind bloweth: if it be in the South, it is very good for that purpose, but if it be in the North or East, it is not good.

It is good to plant or graft generally the Moon increasing in these signs, Taurus or Aquarius in the beginning of the Spring, or latter end of Winter.

Plant trees for continuance, when the Moon is in Taurus, Leo, or Aquarius.

Cut timber to have it sound, in December, or January, in the wane of the Moon in Aquarius or Pisces.

Prune trees and pull off the moss in the month of January.

Plant hedges and hedges for fuel, that the hedges may the sooner grow again, when the Moon is in Aries or Libra, and in her increase.

Set young quick-setts, from September to March.

Remove young trees in the last quarter of the Moon, when she is in Aries, Libra, Scorpio, and in these months, September, November, February.

Set vines in February, March, or September, specially the Moon in Aries, Libra, Scorpio, in her increase.

Set stone-trees in the middle of February, when the Moon is in Aries.

Cut or prune trees in March or April, the Moon in Taurus, Virgo, or Capricorn.

Gather fruit, as Apples, Pears, and the like, at the full of the Moon, or the last quarter, the weather being dry and dry.

Cut down hay presently after the full of the Moon. Dung ground to prevent the growing of weeds, the Moon decreasing.

Sow Carrot-seeds about the end of February or the beginning of March, the Moon increasing.

Sow Onions and Leeks in February or March, at the wane of the Moon.

Set Cucumbers and Melon seed, not above an inch in depth, from the first of April to the 20 in the increase of the Moon.
